

## Create an Asset-Based Work Activity

### From the Assets List

You can create an asset-based work activity from the **Assets** list.

1. Tap **View** on the Top Navigation menu.
2. Tap **Assets**.
3. Tap **Saved Filters**.
4. Select the saved filter you would like to use.
5. Tap **Apply**.

The **Assets** list updates and displays all assets associated to the selected saved filter.

6. Tap an asset's summary card to open the **Asset Details** page.
7. Tap **Create**.
8. Tap the work activity type you would like to create associated to the asset.
9. Select a work activity template.

10. Enter information into the desired fields for the work activity.
11. Tap **Save**.

The work activity is successfully created.

### From a Work Activity

1. Open a work activity that has assets associated to it.
2. Tap **Associated Assets**.
3. Tap **Take Action** on the associated asset you would like to create a related work activity on.

4. Tap **Create Related Inspection**, **Create Related Work Order**, or **Create Related Service Request** depending on the work activity you would like to create.
5. Select a work activity template.
6. Enter information into the desired fields for the work activity.
7. Tap **Save**.

The related work activity is created and appears under its respective related work activity field.
