

Create an Activity from the Map

The **Create Activity** tool allows you to create new work activities from a point on the map or a selection from the map.

From a Point

1. Click **Create Activity** on the map toolbar.
2. Click **Click on the map to capture the desired creation point.**

3. Set a point on the map.

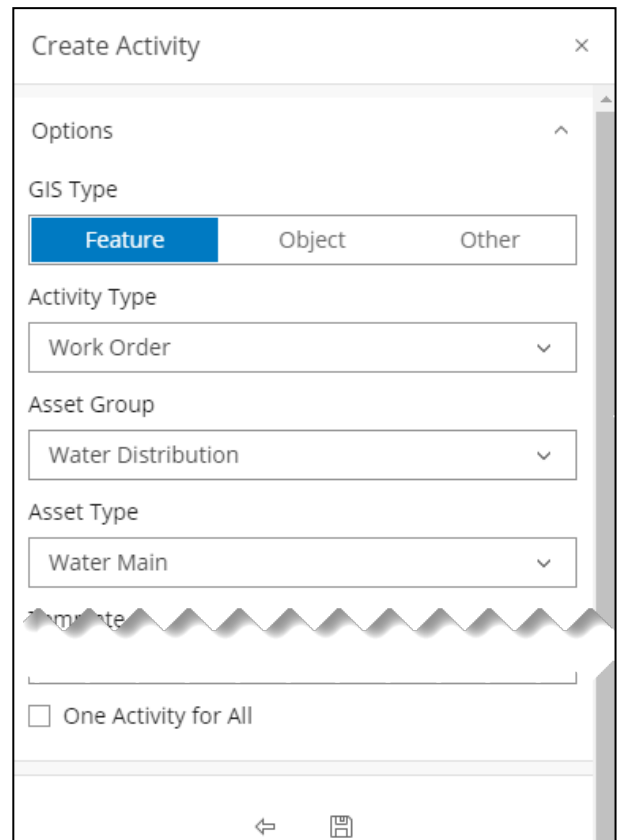

Information about the point appears in the **Point Data** section of the panel, such as the X, Y coordinates.

From a Selection

1. Select assets on the map using the **Legend** and **Selection** tools.
2. Click **Create Activity** on the map toolbar.
3. Select one or multiple assets from the **Assets** section. All assets are automatically selected if no assets are selected and Next is tapped.

After Assets are Selected

1. Click **Next**.
2. Select the **Activity Type** to create.

3. Select information for the new activity as needed.
4. Select the **One Activity for All** check box to combine the assets into one work order or inspection. Leave the **One Activity for All** check box clear, to create a work order or inspection for each asset.
5. Click **Create**.

The new work activity or activities appear in the **Create Activity** panel.

6. Tap **Open** selected activities to open the work activity in the work management window.
7. Tap **Reset** to return to the **Create Activity** panel.
