**Trimble Unity**™

Create a Profile

You can create profiles for specific groups or individuals. For example, you can create a profile for the water crew and another profile for water supervisors.
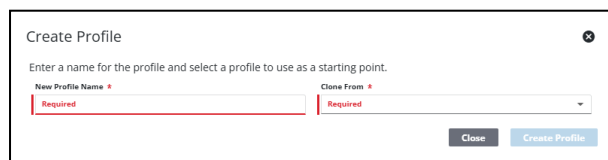

1. Select a plugin from the **Plugin** drop-down list in the **Profile** panel.
2. Click **Create Profile**.

The **Create Profile** panel opens.

3. Enter the **New Profile Name**.
4. Select the profile you want to **Clone From** to create the new profile.
5. Click **Create Profile**.

The new profile is automatically saved and can be defined on the **Plugin Profiles** page in Admin. See Define a Profile in the Admin Guide for Trimble Unity Maintain and Trimble Unity Permit for more information.

6. Add a description about how the profile should or can be used. See Add a Profile Description in the Style Guide for Trimble Unity Maintain and Trimble Unity Permit for more information.
